DETAILED ACTION

Final Rejection

<u> Claim Rejections - 35 USC § 102</u>

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claims 8-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Belik et al. (4,469,369).

Regarding claims 8-12, Belik et al. (4,469,369) discloses in Fig. 1-9 the invention as claimed to include a bus chassis 4, a plurality of body intermediate section types, including; an over wheel section 2 type, a side auxiliary exit 3 type, a side well door 3 type, and a bay seating 31 type; selecting a sub-combination of intermediate section types which in number and intermediate section type occupy a

predetermined length of the chassis when placed in longitudinal alignment; and attaching the sub-combination of intermediate section types in longitudinal alignment to the chassis 4; an end cap 30; and a front end closure 29.

Response to Arguments

1. Applicant's arguments filed 3/24/05 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show, teach or suggest certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., Belik provides for unification of body sections with chassis elements. See col. 7, lines 39 and following where it is stated that unification of chassis elements alongside with unification of body units . . . allows the number of spare parts to be reduced . .. Belik seems to criticize the concept of building a body on a chassis. See col, 1, lines 37-46. ''soviet industry puts on the market a series of motor buses . . . based on chassis units of trucks." Bodies of these motor buses are unified practically only in terms of used (starting) materials and some assemblies of interior equipment." And following at col. 2, lines 29-44.

The wide range of chassis restrains the increase in the capacity of the

manufacture of buses . . . ".;) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

2. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
